

ST RICHARD REYNOLDS CATHOLIC COLLEGE

ST RICHARD REYNOLDS CATHOLIC PRIMARY SCHOOL
ST RICHARD REYNOLDS CATHOLIC HIGH SCHOOL

Sport Premium Impact Statement 2017/18

The funding must be used to make additional and sustainable improvements to the quality of physical education (PE), physical activity and sport offered.

This means that the premium should be used to:

- develop or add to the PE, physical activity and sport activities already offered
- build capacity and capability within the school to ensure that improvements made now will benefit pupils joining the school in future years

The formula for allocating this funding is based on a flat rate of £16,000 per school and an additional £10 per pupil.

Our primary school was allocated a total of £16,900 funding for the 2017/18 academic year and this will be received as follows:

| | |
|---------------|--------|
| October 2017: | £9,858 |
| April 2018: | £7,042 |

As our sports facilities have been limited until we moved into our new building in November 2017, we planned to spend the bulk of our allocation in the second half of the academic year. Our new facilities include a new hall and separate primary play space, which will create further opportunities for us to deliver in the areas listed below.

1. Additional resources to enhance PE and sports activities offered by the school

We have purchased new PE equipment that has increased the activities that the school can offer, including rugby and gymnastics.

Proposed spend approx. £3,800

Impact

- A wider variety of sports planned in to the curriculum with a range of indoor and outdoor equipment.
- Storage purchased to organise outdoor resources.

2. Professional development, mentoring and training

Our link with our High School puts us in a unique position regarding our primary sports provision, as we are able to use specialist staff to develop and enhance the sports provision. Our High School staff are currently timetabled to support primary PE lessons and deliver sports in their specialist areas, including rugby and basketball.

This academic year, we have proposals in place for our specialist High School staff to provide training to PE staff to increase the number of activities that are provided in PE lessons. We will also be sourcing external providers to improve the knowledge and skills of staff teaching PE.

Proposed spend approx. £9,750

Impact

- High School Specialist teachers used to develop knowledge and skills of staff (evidenced through planning and lesson monitoring).
- Progression of skills and knowledge planned.

3. Swimming lessons

We will be spending on additional swimming lessons in the summer term, with the aim of entering our first school swimming teams within the borough championships. There will also be a focus on ensuring our first Year 6 cohort will meet the new the national curriculum requirement - To swim competently, confidently and proficiently over a distance of at least 25 metres, use a range of strokes effectively and perform safe self-rescue in different water-based situations.

Proposed spend approx. £800

Impact

- KS2 Pupils competed for the first year in the Borough competition.
- Pupils provided with opportunities to develop a range of swimming strokes.

4. Schools Sports Partnership

As the school grows, we will start entering our pupils in more borough leagues and tournaments and with the planned addition of a new full sized court in our primary playground, we will be able to host some events here.

We will use our sports premium to help fund the costs of this participation, including travelling to these events, provision of new sports kit and equipment for these events.

Proposed spend approx. £1,700

Impact

- First year that pupils entered in to gymnastics, netball, football, basketball, rugby and swimming competitions.
- Pupils finished second in Borough basketball competition.
- Access to CPD and Schools Sports Coordinator network to develop effective pedagogy.

5. New sports, dance and other activities

We plan to bring in specialist coaches to provide classes in new areas for our primary school pupils, including martial arts and different types of dance.

Proposed spend approx. £2,000

Impact

- Pupils introduced to Dodgeball and entered Borough competition.
- New extra-curricular sports introduced.
- Whole School Dance Competition introduced in to the PE Curriculum. Pupils taught a variety of different dance styles.

6. Embedding physical activity into the school day

We are linking the work we are performing as part of our school travel plan by encouraging and promoting walking or cycling to school through various events, such as safe walking and a school bike event and scooter proficiency.

Proposed spend approx. £800

Impact

- Scooter training completed for Year 2 and Safer walking training for Year 3.
- Through the introduction of the Daily Mile initiative in KS2 pupils are active daily.
- Bronze level awarded for school travel plan with a number of school and extra-curricular initiatives

Total proposed spend: £18,850

Monitoring and Evaluation of Intended Outcomes

The impact that this additional funding has had is to increase opportunities for our children and to encourage our children to adopt and develop healthy lifestyles. All of our primary school children have benefitted and will continue to benefit from the additional provision, regardless of sporting ability.

As many of the initiatives are new, we are developing a formal means of tracking the impact of funding, which will include:

- Lesson observations and review of the impact and use of additional training provided to primary staff
- Increased number of pupils entering tournaments and success from these tournaments
- Increased participation in lunchtime and after school clubs (both free and paid for clubs)
- Increased participation of our pupil premium children in extra-curricular sporting activity
